

Business Dashboard and Analytics

Operator Workbook

Define metrics, clean source data, trace the customer journey, build an operator dashboard, and turn numbers into decisions.

LEARN	PRACTICE	CHECK	BUILD
8	Every lesson	80% pass	Capstone

How to use this workbook

This workbook is the working layer of the course. Use it while watching or reading the lesson, then complete the practice before marking the lesson done. Keep source material, first drafts, revisions, and review evidence together.

- ☐ Read or watch the lesson in order.
- ☐ Replace every bracketed prompt field with approved facts.
- ☐ Save the first result before revising.
- ☐ Run the pass standard and fix material defects.
- ☐ Submit designated builds for review.
- ☐ Pass the lesson checks and final at 80 percent or higher.

Completion standard

Watching does not equal completion. Completion requires every lesson, every assignment, every lesson check, the final assessment, and approval of designated deliverables. Completion letters are private course records. They are not degrees, professional licenses, accreditation, state or federal certification, promises of employment, or guarantees of business results.

Course roadmap

#	Lesson	Evidence
1	Start With Decisions	Assignment saved
2	Define the Metrics	Assignment saved + review
3	Map the Source Data	Assignment saved
4	Clean and Validate	Assignment saved + review
5	Build the Funnel	Assignment saved
6	Design the Operator Dashboard	Assignment saved + review
7	Diagnose the Change	Assignment saved
8	Run the Weekly Review	Assignment saved + review

LESSON 01

Start With Decisions

Result

Choose metrics only after naming the decisions the dashboard must support.

Operator method

- ☐ List recurring decisions
- ☐ Name the owner
- ☐ Define the action threshold

Exact working prompt

Interview me one question at a time to identify the weekly decisions for [business]. Then return a decision register with owner, frequency, input metrics, threshold, action, and data source.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Create a register of ten recurring decisions.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Every metric is tied to a decision, owner, and action.

Reviewer or self-review notes

LESSON 02

Define the Metrics

Result

Write unambiguous formulas, dimensions, windows, and exclusions.

Operator method

- ☐ Name numerator and denominator
- ☐ Set the time window
- ☐ Document exclusions

Exact working prompt

Create a metric dictionary for [list of metrics]. For each give business meaning, exact formula, grain, time window, dimensions, exclusions, source, owner, refresh, and warning about misuse.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Approve definitions for twelve core metrics.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Two people using the definition calculate the same result from the same data.

Reviewer or self-review notes

LESSON 03

Map the Source Data

Result

Trace every metric to an owned table, system, export, or verified source.

Operator method

- ☐ Inventory systems
- ☐ Choose the source of truth
- ☐ Document join keys

Exact working prompt

Build a source map for these metrics and systems: [paste]. Return source of truth, required fields, IDs, join keys, freshness, owner, known gaps, and data classification.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Draw the source-to-metric lineage for the top five metrics.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Every displayed number has a source, join path, refresh expectation, and owner.

Reviewer or self-review notes

LESSON 04

Clean and Validate

Result

Find duplicates, missing values, invalid categories, broken dates, and impossible states.

Operator method

- ☐ Profile the data
- ☐ Apply explicit rules
- ☐ Record exceptions

Exact working prompt

Create a data quality plan for this schema or sample: [paste]. Include completeness, uniqueness, validity, consistency, timeliness, referential integrity, outliers, severity, remediation owner, and acceptance threshold.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Run the checks on one export and create an issue log.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Critical fields meet thresholds or the dashboard clearly labels the limitation.

Reviewer or self-review notes

LESSON 05

Build the Funnel

Result

Trace attention through leads, qualified opportunities, sales, delivery, and retention.

Operator method

- ☐ Define every stage
- ☐ Use stable identifiers
- ☐ Separate volume from conversion

Exact working prompt

Design a business funnel for [business]. Define each stage, entry event, exit event, owner, source table, dedupe rule, conversion formula, cycle time, and common leakage.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Calculate one full period and reconcile stage totals to source records.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Stages are mutually understandable, conversions use consistent cohorts, and totals reconcile.

Reviewer or self-review notes

LESSON 06

Design the Operator Dashboard

Result

Show current state, target, trend, exception, and next action without clutter.

Operator method

- ☐ Lead with the decision
- ☐ Use the right visual
- ☐ Show data quality

Exact working prompt

Design a one-page operator dashboard for these decisions and metrics: [paste]. Group by question, recommend KPI cards, trends, funnels, tables, filters, alerts, quality indicators, and drill-downs. Explain why each visual fits.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Build the wireframe and remove any chart with no decision use.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

A weekly reviewer can spot exceptions and identify the next action in under five minutes.

Reviewer or self-review notes

LESSON 07

Diagnose the Change

Result

Move from what changed to where, why, confidence, and the next test.

Operator method

- ☐ Verify the number
- ☐ Segment the change
- ☐ Separate evidence from hypothesis

Exact working prompt

Diagnose this metric change: [paste data and context]. Verify calculation, compare periods, segment by source and cohort, identify contribution, list plausible causes, rank by evidence, and recommend the next check. Do not claim causation without evidence.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Write one metric diagnostic from current business data.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

The diagnosis shows calculations, distinguishes fact from hypothesis, and identifies the smallest useful next check.

Reviewer or self-review notes

LESSON 08

Run the Weekly Review

Result

Use a fixed meeting rhythm to record decisions, owners, and follow-through.

Operator method

- ☐ Review exceptions
- ☐ Choose actions
- ☐ Record the decision

Exact working prompt

Create a thirty-minute weekly business review agenda using this dashboard: [paste]. Include data quality, major changes, funnel exceptions, cash and capacity, decisions, owners, due dates, and follow-up on prior actions.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Run the meeting once and publish the decision log.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

The meeting ends with specific actions, owners, due dates, and a record of why each decision was made.

Reviewer or self-review notes

Final assessment and capstone

Before opening the final, confirm that every lesson artifact is saved and every designated build has a viewable submission link. The final assessment requires at least 80 percent. Retakes are allowed.

Capstone evidence checklist

- ☐ Approved brief and intended result
- ☐ Source or evidence register
- ☐ Working prompt or operating template
- ☐ First result and final result
- ☐ Quality-control record
- ☐ Privacy, security, and approval review
- ☐ Repeatable runbook
- ☐ Viewable capstone link
- ☐ One measurable result or decision metric

Capstone link

What I built and why it matters

Private course record disclaimer

This workbook and any completion letter document participation in a private LeadFlow Pro course operated by Longview Training Center LLC. They do not create a degree, professional license, accreditation, government certification, promise of employment, or guarantee of business results.
