

The Follow-Up Engine

Operator Workbook

Build permission-based email, call, and text follow-up that answers questions, records the next action, and protects trust.

LEARN	PRACTICE	CHECK	BUILD
8	Every lesson	80% pass	Capstone

How to use this workbook

This workbook is the working layer of the course. Use it while watching or reading the lesson, then complete the practice before marking the lesson done. Keep source material, first drafts, revisions, and review evidence together.

- ☐ Read or watch the lesson in order.
- ☐ Replace every bracketed prompt field with approved facts.
- ☐ Save the first result before revising.
- ☐ Run the pass standard and fix material defects.
- ☐ Submit designated builds for review.
- ☐ Pass the lesson checks and final at 80 percent or higher.

Completion standard

Watching does not equal completion. Completion requires every lesson, every assignment, every lesson check, the final assessment, and approval of designated deliverables. Completion letters are private course records. They are not degrees, professional licenses, accreditation, state or federal certification, promises of employment, or guarantees of business results.

Course roadmap

#	Lesson	Evidence
1	Map the Follow-Up Moment	Assignment saved
2	Write the First Response	Assignment saved
3	Build a Seven-Touch Sequence	Assignment saved + review
4	Handle No Response	Assignment saved
5	Answer Objections in Context	Assignment saved
6	Log the Conversation	Assignment saved
7	Measure the Sequence	Assignment saved
8	Launch With Human Control	Assignment saved + review

LESSON 01

Map the Follow-Up Moment

Result

Choose the right next message based on what the lead actually requested.

Operator method

- ☐ Name the trigger
- ☐ Match the channel
- ☐ Set a stop condition

Exact working prompt

Map the follow-up for this trigger: [form, purchase, missed call, quote, or download]. Return the lead expectation, first response, channel, timing, owner, stop condition, and required record update.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Create a trigger-to-next-action map for five common lead events.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Every message is connected to a real trigger, documented consent, and a stop condition.

Reviewer or self-review notes

LESSON 02

Write the First Response

Result

Confirm the request and make the next step easy.

Operator method

- ☐ Lead with context
- ☐ Answer the obvious question
- ☐ Ask for one action

Exact working prompt

Write the first follow-up for [trigger] from [business]. Mention exactly what the person requested, deliver or confirm it, answer the likely next question, and ask for one small next action. Give email, SMS, and voicemail versions. Do not add false urgency.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Write and read aloud all three channel versions.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

The recipient can identify the business, remember the request, and act without decoding the message.

Reviewer or self-review notes

LESSON 03

Build a Seven-Touch Sequence

Result

Create a short sequence that adds value instead of repeating the same ask.

Operator method

- ☐ Give each touch a job
- ☐ Vary the question
- ☐ Stop when the goal is reached

Exact working prompt

Create a seven-touch follow-up sequence for [offer and trigger]. For each touch include day, channel, purpose, message, value added, call to action, and stop condition. Respect channel consent and quiet hours.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Build the sequence in a table and remove any touch that adds no new value.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Each touch has a distinct purpose and the sequence stops on reply, opt-out, booking, or purchase.

Reviewer or self-review notes

LESSON 04

Handle No Response

Result

Use respectful check-ins, channel changes, and a clean close-the-loop message.

Operator method

- ☐ Assume distraction, not rejection
- ☐ Offer an easy answer
- ☐ Close the loop

Exact working prompt

Write three no-response messages for [context]: a gentle reminder, a useful alternative, and a close-the-loop note. Each must be under 90 words and include an easy way to say not now.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Add the three messages to the sequence with stop rules.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Messages remain contextual, low pressure, and easy to decline.

Reviewer or self-review notes

LESSON 05

Answer Objections in Context

Result

Turn price, timing, trust, and fit questions into clear next decisions.

Operator method

- ☐ Repeat the concern accurately
- ☐ Answer with evidence and limits
- ☐ Offer the next decision

Exact working prompt

Create response cards for these objections: [paste]. Each card needs the concern in the buyer's words, a direct answer, proof or source, limitation, and a low-pressure next question.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Build ten approved objection cards for your team.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

No card invents proof, argues with the lead, or hides a meaningful limitation.

Reviewer or self-review notes

LESSON 06

Log the Conversation

Result

Record the promise, objection, status, owner, and next action after every meaningful exchange.

Operator method

- ☐ Capture facts
- ☐ Separate notes from inference
- ☐ Set the next action

Exact working prompt

Turn these conversation notes into a CRM update: [paste notes]. Return facts, stated need, objections, promises made, consent changes, stage, next action, owner, and due date. Mark every inference as inference.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Process five past conversations into clean lead records.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

The next person can continue the conversation without guessing or rereading a transcript.

Reviewer or self-review notes

LESSON 07

Measure the Sequence

Result

Use delivery, replies, qualified conversations, bookings, sales, and opt-outs to improve follow-up.

Operator method

- ☐ Choose behavior metrics
- ☐ Segment by trigger
- ☐ Change one variable

Exact working prompt

Design a weekly follow-up scorecard for [sequence]. Include delivery, reply, positive reply, qualified conversation, booking, purchase, opt-out, complaint, time-to-first-response, and data quality. Define each metric and the decision it supports.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Build the scorecard and enter one week of baseline data.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Metrics connect to decisions and separate vanity opens from meaningful outcomes.

Reviewer or self-review notes

LESSON 08

Launch With Human Control

Result

Automate safe delivery and reminders while keeping approval around sensitive or consequential messages.

Operator method

- ☐ Classify safe automation
- ☐ Create approval gates
- ☐ Test stop and opt-out logic

Exact working prompt

Audit this follow-up workflow for automation risk: [paste workflow]. Classify each action as automatic, review before send, or human only. Explain privacy, consent, reputation, and business risks. Return a launch checklist.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Run the sequence with test records and document every approval gate.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Opt-outs stop future sends, sensitive messages require review, and every send is traceable.

Reviewer or self-review notes

Final assessment and capstone

Before opening the final, confirm that every lesson artifact is saved and every designated build has a viewable submission link. The final assessment requires at least 80 percent. Retakes are allowed.

Capstone evidence checklist

- ☐ Approved brief and intended result
- ☐ Source or evidence register
- ☐ Working prompt or operating template
- ☐ First result and final result
- ☐ Quality-control record
- ☐ Privacy, security, and approval review
- ☐ Repeatable runbook
- ☐ Viewable capstone link
- ☐ One measurable result or decision metric

Capstone link

What I built and why it matters

Private course record disclaimer

This workbook and any completion letter document participation in a private LeadFlow Pro course operated by Longview Training Center LLC. They do not create a degree, professional license, accreditation, government certification, promise of employment, or guarantee of business results.
