

The Website Conversion System

Operator Workbook

Plan, write, build, test, and improve a fast website that gives each visitor one clear path to a measurable next action.

LEARN	PRACTICE	CHECK	BUILD
8	Every lesson	80% pass	Capstone

How to use this workbook

This workbook is the working layer of the course. Use it while watching or reading the lesson, then complete the practice before marking the lesson done. Keep source material, first drafts, revisions, and review evidence together.

- ☐ Read or watch the lesson in order.
- ☐ Replace every bracketed prompt field with approved facts.
- ☐ Save the first result before revising.
- ☐ Run the pass standard and fix material defects.
- ☐ Submit designated builds for review.
- ☐ Pass the lesson checks and final at 80 percent or higher.

Completion standard

Watching does not equal completion. Completion requires every lesson, every assignment, every lesson check, the final assessment, and approval of designated deliverables. Completion letters are private course records. They are not degrees, professional licenses, accreditation, state or federal certification, promises of employment, or guarantees of business results.

Course roadmap

#	Lesson	Evidence
1	Give Each Page One Job	Assignment saved
2	Map the Site Path	Assignment saved
3	Write the Page Structure	Assignment saved + review
4	Write Human Copy	Assignment saved
5	Build the Interaction	Assignment saved + review
6	Connect the Owned Record	Assignment saved
7	Test Speed, Accessibility, and Trust	Assignment saved
8	Improve From Behavior	Assignment saved + review

LESSON 01

Give Each Page One Job

Result

Define the visitor, question, action, and success event for every important page.

Operator method

- ☐ Name the traffic source
- ☐ Answer one primary question
- ☐ Choose one success event

Exact working prompt

Create a page-job brief for [page]. Include target visitor, arrival source, primary question, proof needed, main action, secondary action, success event, and what does not belong on the page.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Complete page-job briefs for the homepage, offer page, and thank-you page.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Each page has one primary action and a measurable definition of success.

Reviewer or self-review notes

LESSON 02

Map the Site Path

Result

Build the shortest clear route from arrival to result.

Operator method

- ☐ List entry points
- ☐ Remove dead ends
- ☐ Connect confirmation and follow-up

Exact working prompt

Map a website journey for [buyer and offer]. Start with entry sources and show pages, questions answered, decisions, form or checkout, thank-you page, and follow-up. Identify dead ends and unnecessary steps.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Draw the current and proposed site paths.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Every entry point reaches a useful result or clear exit without circular navigation.

Reviewer or self-review notes

LESSON 03

Write the Page Structure

Result

Arrange problem, result, proof, process, fit, FAQ, and action in a scannable order.

Operator method

- ☐ Lead with relevance
- ☐ Answer risk before asking
- ☐ Repeat the action at decision points

Exact working prompt

Create a conversion-focused wireframe for [offer page] using the approved offer brief. For each section give purpose, headline, supporting copy, proof, visual, and call to action. Keep mobile scanning in mind.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Build the annotated wireframe before writing final copy.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

The order follows the visitor's questions and the call to action appears only at logical decision points.

Reviewer or self-review notes

LESSON 04

Write Human Copy

Result

Turn the approved brief into specific, plain-language website copy.

Operator method

- ☐ Use the buyer's language
- ☐ Prefer specifics
- ☐ Remove unsupported superlatives

Exact working prompt

Write the full page from this wireframe and source material: [paste]. Use short sentences, concrete nouns, proof-linked claims, useful headings, one primary call to action, and no hype. Flag any missing proof instead of inventing it.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Draft, read aloud, and revise the page copy.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

A visitor can explain the offer, fit, evidence, and next step after a sixty-second scan.

Reviewer or self-review notes

LESSON 05

Build the Interaction

Result

Create a responsive page with a working form, states, and accessible controls.

Operator method

- ☐ Start with semantic structure
- ☐ Design mobile first
- ☐ Handle loading, success, and error

Exact working prompt

Build a responsive one-page site for [fictional or approved business] from this brief: [paste]. Include semantic HTML, accessible labels, visible focus, mobile layout, working client-side validation, loading, success, and error states. Do not claim a backend exists unless connected.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Build the page in a preview environment and test keyboard navigation.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

The primary action works, every field is labeled, and all states are visible and recoverable.

Reviewer or self-review notes

LESSON 06

Connect the Owned Record

Result

Send form and checkout outcomes into the correct lead, customer, or order record.

Operator method

- ☐ Validate on the server
- ☐ Preserve source and consent
- ☐ Return a safe response

Exact working prompt

Design the server-side intake for this form: [fields and destination]. Return validation rules, field mapping, consent capture, dedupe approach, record status, success response, error response, logging, and abuse controls.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Document the full form-to-record contract and run two test records.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

The server rejects invalid data, stores consent and source, and never exposes secrets to the browser.

Reviewer or self-review notes

LESSON 07

Test Speed, Accessibility, and Trust

Result

Catch slow media, broken layouts, inaccessible controls, missing disclosures, and unclear claims.

Operator method

- ☐ Test real devices
- ☐ Run automated checks
- ☐ Review claims and disclosures manually

Exact working prompt

Create a prelaunch website QA plan for [site]. Include mobile breakpoints, browsers, keyboard, contrast, forms, images, metadata, performance, privacy, terms, claim verification, analytics, and rollback.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Run the checklist and record evidence for every failed and passed item.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

Critical paths work on mobile and keyboard, pages load acceptably, and public claims match their sources.

Reviewer or self-review notes

LESSON 08

Improve From Behavior

Result

Use first-party events and buyer feedback to make one controlled improvement at a time.

Operator method

- ☐ Establish a baseline
- ☐ Find the largest useful drop
- ☐ Test one change

Exact working prompt

Analyze this page performance data: [paste metrics and feedback]. Separate facts from hypotheses, identify the largest decision-relevant drop, propose three tests, rank by effort and evidence, and define success and stop thresholds.

Practice record

Input or source used:

What changed between the first and final result?

Assignment

Choose one test, record the baseline, and write the experiment card.

- ☐ Source material saved
- ☐ First result saved
- ☐ Final result saved
- ☐ Review completed

Pass standard

The test changes one main variable, has a defined window, and uses a decision metric tied to the page job.

Reviewer or self-review notes

Final assessment and capstone

Before opening the final, confirm that every lesson artifact is saved and every designated build has a viewable submission link. The final assessment requires at least 80 percent. Retakes are allowed.

Capstone evidence checklist

- ☐ Approved brief and intended result
- ☐ Source or evidence register
- ☐ Working prompt or operating template
- ☐ First result and final result
- ☐ Quality-control record
- ☐ Privacy, security, and approval review
- ☐ Repeatable runbook
- ☐ Viewable capstone link
- ☐ One measurable result or decision metric

Capstone link

What I built and why it matters

Private course record disclaimer

This workbook and any completion letter document participation in a private LeadFlow Pro course operated by Longview Training Center LLC. They do not create a degree, professional license, accreditation, government certification, promise of employment, or guarantee of business results.
